sim2grow's TOTAL Med Admin Solution

Product and Pricing

Created for Nurses by Nurses!

We experienced firsthand the problem of a lack of affordable integrated tools to teach safe med pass from start to finish. So we fixed it ourselves!

*Every critical element is included. Every obstacle eliminated...**all designed and programmed by us, the sim2grow co-founders.***

HOW WE CAN *HELP*

Nursing programs need an integrated med room to bedside solution to train students in safe medication administration. This training is **too important** to not get right.

Students deserve unlimited practice because patient **lives are at risk**.

You deserve equipment that is easy to set up and use and is **reliable day in and day out**.

We know each program is unique. Choose a sim2grow system package matching the size and needs of **your** program. No need to accept a one-size-fits-all product.

The sim2grow *DIFFERENCE*

When comparing features, here are a few key details that make sim2grow's med admin stand out in the market:

Nursing Program

- Integrated all-in-one product including:
 - dispensing unit
 - medication tags
 - barcode scanning of **patient and med**
 - electronic documentation
- Sustainable/ reusable barcode tags
- Customizable: unlimited patients and med orders
- Simple, one-time initial set up
- No resetting inventory or med orders
- Automatically resets between student users
- Onboarding and Annual faculty training

Information Technology

- No need for WiFi during student use
- No need for access behind institutional firewalls
- FERPA friendly: no sensitive student information tracked
- Unlimited student use: no student subscription fees
- No individual student login
- Free ongoing technical support, software patches, and feature upgrades

PROTECTING *YOUR* INVESTMENT

Bringing sim2grow's reliable and user-friendly medication administration training system into your program adds enormous academic and clinical value.

This investment in student success is protected by our **ANNUAL** software licensing program including:

- Software use
- Ongoing customer support so you experience seamless dispensing and med admin
- Annual software training so faculty are always up-to-date
- Any new software features or enhancements so your system reflects current practice
- **New iPads every 3 years** so aging technology doesn't become a blocker to student practice.

THE PLAN

Here's what the process looks when you're ready to take a deeper dive
